This website consists of:

1. Main page(index.php)
2. Members page
3. Statistics
4. Project Forum
5. Login/register
6. Profile

1. Main Page(index.php)

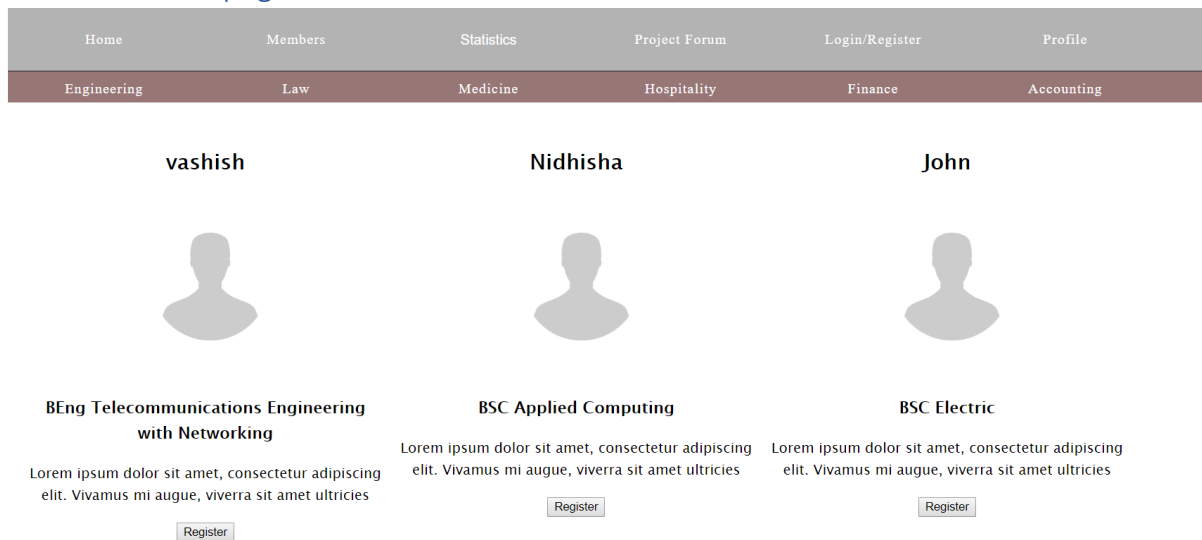

The main page has details about this website of what it provides and its goal to facilitates the access towards our new students and fresh graduates who are searching for a new job.

The 400x200 article will show the statistics and on click it should head to statistics.php.

Moreover it should also consist of easy access buttons through a nav bar to the members, statistics and forum page etc.

The mainpage is used as a welcome page aswell.

2. Members page

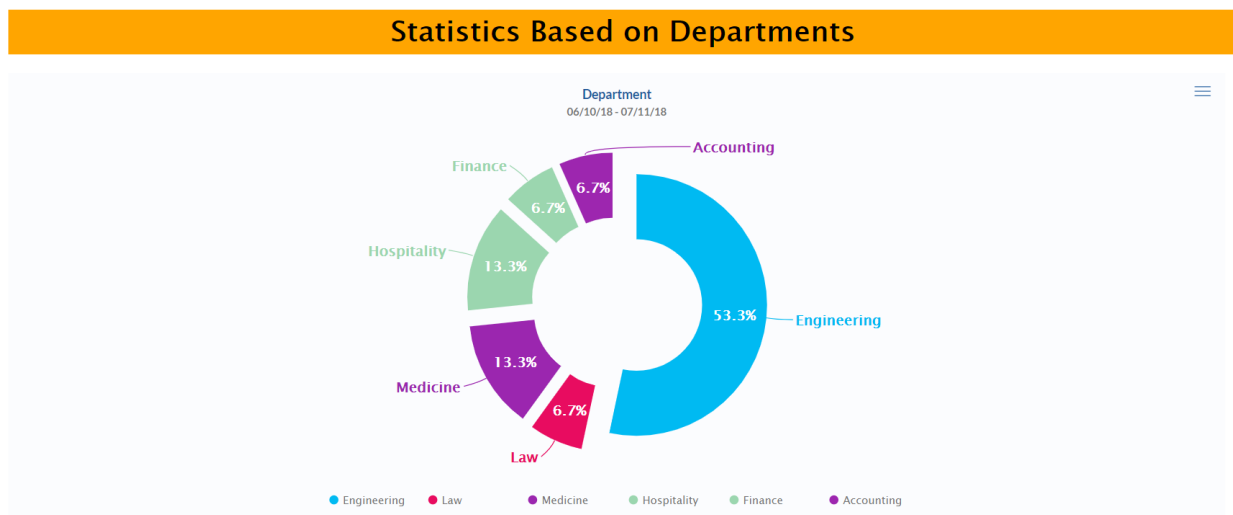

The members.php page has another nav bar which should be able ease access to other members area which will specifically call data from database with 'fieldofstudy = 'Engineering' as and example for the memberseng.php page.

The memberseng.php page and other aswell changes automatically when a new user is added to the database.

The others have 'fieldofstudy = 'Medicine/Law' etc respectively.

3. Statistics page

The statistics page is connected to the `SELECT COUNT(*)` from users WHERE 'fieldofstudy = 'Engineering' as an example for the engineering. It has query for each and every of the respected fields.

It changes in real time as soon as the numbers in the database changes.

There are 2 more pages statistics2.php and statistics3.php for boys and girls respectively. More charts can be added easily.

4. Project forum

hi
[Support project \(3854\)](#)

The project forum has the ability to take posts, parent replies and child replies aswell.

With the help of session, each and everyone connected has the ability to get their username displayed such as the Admin page here as an example. The comment is saved on the demo database with child and parents table.

It has like buttons and delete button to allow the post to be supported for project and delete for comments (currently not working).

5. Login/Register page

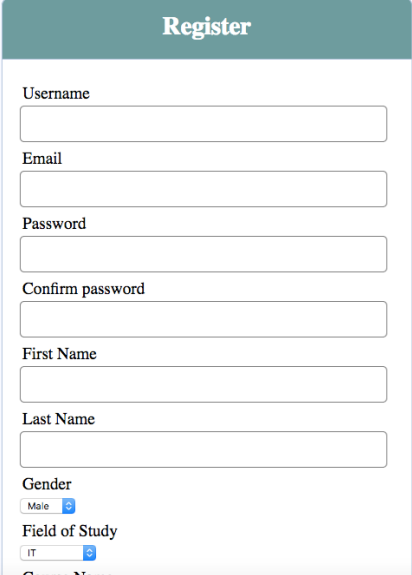

A login form with a teal header labeled "Login". It contains two text input fields for "Username" and "Password". Below the password field is a teal "Login" button. At the bottom, it says "Not yet a member? [Sign up](#)".

Not yet a member? [Sign up](#)

A register form with a teal header labeled "Register". It contains several text input fields for "Username", "Email", "Password", "Confirm password", "First Name", and "Last Name". Below these are dropdown menus for "Gender" (with "Male" selected) and "Field of Study" (with "IT" selected). The "Course Name" field is partially visible at the bottom.

Course Name

The login and register, by default, on clicking Login/Register it will go to login.php and if the user is not a member yet, he can click on Sign Up and the will go to register.php page where all the credentials will be saved to users table from Demo database.

The register and login page has the ability to check of theres already a user in the database and will output on the same page that theres a user already there with same user name and email.

The 2 passwords should match else the credentials wont be save.

The field of study is and important aspect in order to allow the statistics page. Therefore, some fields has required for filling.

The 2 screenshots above are for the profile page where once registered, it heads to profile.php and the allow the user to update their credentials.

This will not be shown publicly and on the Memberseng.php page, the REGISTER button will ask the user for a request.

The following details are entered in the demo and profile.sql database.

These details can be retrieved along with the profile picture of the user.
